Summary

My dive into modern platforms began with Docker, and learning about containers at the lowest level. From there my career introduced me to Kubernetes, Google's own Container Orchestration Solution. Using K8s and Helm, I aim to distill complex business solutions down to the simplest deployment possible.

Experience

Software Developer

Five9

Aug 2018 - Present (2 years 6 months +)

Moving from private cloud to public. Docker, Helm charts, Kubernetes, Istio, Terraform, Gitlab, CI/CD, and all thing Google Cloud.

Application Platform Engineer Intern

Five9

May 2018 - Aug 2018 (4 months)

Researching industry best-practices for developers within Five9. Git, Kubernetes, Helm, and how they can be automated.

Devops Intern at Engineering Research

Colorado State University

Aug 2017 - May 2018 (10 months)

The logical deployment and sustenance of On-Prem Kubernetes Cluster for the Air, Water, and Energy Research at Colorado State University, serving environmental research data to the public.

Software Development Intern

Five9

May 2017 - Aug 2017 (4 months)

Primarily assisted with the development of a SMS Routing Service, as a POC for expanding Omnichannel Customer Service. Studied Springboot principals, improved code quality, and modified database.

Computer Science Department Tutor

Colorado State University

Sep 2016 - May 2017 (9 months)

Colorado State University provides free tutors to students in the department. I was a tutor as a freshman which is note-able because not many freshman had the required course credits, which I acquired through AP classes in high school

Assistant Instructor of Programming

Galileo Learning

May 2016 - Aug 2016 (4 months)

Conducted week-long classes for middle school age groups titled "Mod Design with Minecraft". Groups of 14-16 students follow a strong curriculum teaching simple Java skills, allowing students to add custom game elements, actions, and designs.
